

Verify your ID, show your work on video, and get hired on proof. **Resumes tell. Vetano shows.**

FOR STUDENTS AND NEW GRADS

Get hired on what you can actually do

Vetano is a hiring app for skilled trade and hourly work. Instead of sending a resume and hoping, you show the work: short videos of you doing the thing you are good at, attached to an identity an employer can trust. Free for candidates. Employers pay to post the jobs.

HOW IT WORKS

Takes about 15 minutes, free, works from your phone.

01

Verify your ID. A one-time government ID check in the app, about two minutes.

02

Record a short intro. Thirty to sixty seconds in your own words: what you trained in, what you can do, what you want next.

03

Record your actual work. A weld, a cut, a service, a plate, a set. The task on camera, so an employer sees the skill before they meet you.

Then apply to open jobs, free, right from the app.

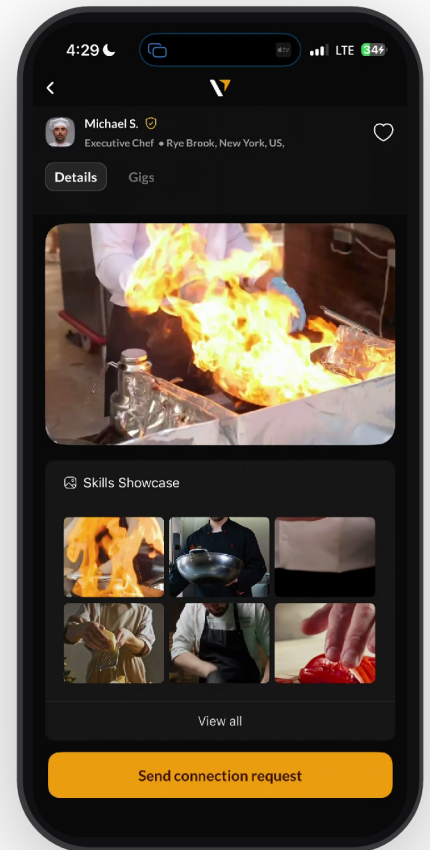

WHO THIS IS FOR

- Graduating seniors from a trade or technical program
- Adults finishing electrical, HVAC, welding, automotive, culinary, cosmetology or similar training
- Anyone with real skill and a thin work history

WHAT YOU NEED

- A phone that records video
- A government issued ID
- The skill you trained for

No resume required. No fee to join, get verified, or apply to jobs.

Scan to get started

For counselors and instructors. There is nothing to buy and nothing to sign. Hand this page to students, or email support@vetano.com and we will answer questions directly. Vetano does no background checks, no credit checks, no license or credential verification, and no employment eligibility verification, and is not an employer of record. Identity verification and proof-of-skill video are what the platform provides. Optional Pro tools for gig work are available in-app; nothing on this page requires them.
